Summary

Experienced, results-driven Software Engineer with a proven track record of delivering cutting-edge web applications and driving innovation. With a strong foundation in JavaScript, along with extensive knowledge and experience in React, TypeScript, NextJS and more, I bring over seven of hands-on expertise to the table. My passion for creating responsive and dynamic user interfaces is matched by my ability to lead and mentor development teams, ensuring the highest code quality and project success. From architecting complex front-end solutions to optimizing performance, I am committed to pushing the boundaries of what I can achieve. Looking for an opportunity to utilize my skills and experience to contribute to a forward-thinking, collaborative team and company.

Experience

Frontend Software Engineer

CBT Nuggets

Feb 2020 - Present (3 years 8 months)

- Implemented clean and scalable user features, landing pages, internal tools utilizing ReactJS and TypeScript.
- Efficiently implemented new designs and updates to company product from wireframes and mockups.
- Worked on multiple software projects simultaneously while participating in the full software development lifecycle from design, implementation to deployment.
- Owned and built out internal front-end npm library used across all company products.

Lead Full Stack Developer

Real Time Reviews

Jul 2018 - Feb 2020 (1 year 8 months)

- Designed and developed robust white-label software utilizing React and NodeJS.
- Engineered and developed external APIs to support partnering company integrations, and secure data between server and client.
- Utilized AWS to create a proprietary support chat bot system with two way texting features.

Web & Mobile App Developer

Novo Square

May 2015 - Jul 2018 (3 years 3 months)

- Designed and developed large scale web / mobile applications for multiple clients.
- Integrated 3rd party APIs for user analytics tracking, advertisements and payment systems.
- Resolved customer and client issues by establishing workarounds and solutions, as well as debugging and creating defect fixes quickly.
