Summary

Experienced and results-driven Software Engineer with over seven years of proven expertise in delivering cutting-edge web applications and driving innovation. Possessing a strong foundation in JavaScript, I bring extensive knowledge and experience in React, TypeScript, Next.js, and more to the table. My passion for creating responsive and dynamic user interfaces is matched by my ability to lead and mentor development teams, ensuring the highest code quality and project success. From architecting complex front-end solutions to optimizing performance, I am committed to pushing the boundaries of what I can achieve. Seeking an opportunity to leverage my skills and experience to contribute to a forward-thinking, collaborative team and company.

Skills

ReactJS, Next JS, TypeScript, Node.js, AWS, GraphQL, JavaScript, GitHub

Experience

Senior Software Developer

CBT Nuggets • Bend, OR
02/2020 - Present
- Implemented responsive design principles and optimized applications for various devices and screen sizes, enhancing user experience and accessibility.
- Leveraged React hooks, context API, and other advanced features to streamline development processes and improve code readability.
- Conducted code reviews, provided constructive feedback, and mentored junior developers to foster growth and maintain coding standards.
- Collaborated with backend developers to integrate frontend components with server-side logic and databases.

Lead Full Stack Developer

Real Time Reviews • Flagstaff, Arizona
08/2018 - 01/2020
- Developed robust white-label software utilizing React and Node JS.
- Designed, developed and implemented external APIs to support partnering company integrations, and secure data between server and client.
- Utilized AWS to create a proprietary support chatbot system with two-way texting features.
- Contributed to architectural decisions and participated in sprint planning, estimation, and prioritization meetings to meet project deadlines and deliverables.

Web & Mobile App Developer

Novo Square Studios • Atlanta, GA
05/2015 - 07/2018
- Collaborated closely with designers to implement responsive and visually appealing user interfaces based on mockups and wireframes.
- Integrated 3rd party APIs for user analytics tracking, advertisements and payment systems.
- Proactively resolved customer and client issues by establishing workarounds and solutions, as well as debugging and creating defect fixes quickly.

Education

Business

Santa Fe College • Gainesville, FL
08/2011
